INVESTMENT OBJECTIVE AND STRATEGY

Franklin Bissett Canadian Government Bond Fund (the “Fund”) seeks current income, liquidity and a modest level of capital appreciation by investing primarily in bonds issued by Canadian federal, provincial and municipal governments and government agencies, mortgage-backed securities and real-return bonds.

The Fund invests primarily in investment-grade debt securities, including fixed income and floating rate securities, issued or guaranteed by various levels of government in Canada or agencies of these governments. The Fund may also invest up to 10% of its assets in bonds issued by foreign governments and their agencies that are denominated in Canadian dollars, and may also invest in cash, money-market securities, real-return bonds and mortgage-backed securities issued or guaranteed by various levels of government in Canada, and other types of securities at the discretion of the Fund’s investment advisor (the “portfolio manager”).

RISK

The risks of investing in the Fund remain as stated in the prospectus. The Fund is suitable for investors who are seeking interest income and some capital appreciation, planning to hold their investment for a medium-term time period, and willing to accept low investment risk.

RESULTS OF OPERATIONS

As at December 31, 2017, total net asset value of the Fund was \$758.6 million, an increase of 305.3% from December 31, 2016. This was primarily driven by \$559.4 million in net subscriptions and an increase of \$12.0 million in net assets from operations.

During the past year, the Fund’s Series O units generated total returns of 3.5%. Over the same time period, the Fund’s benchmark, the FTSE TMX Canada All Government Bond Index (the “Index”), returned 2.2%. The performance of the Fund’s other series is similar to that of its Series O units, except for differences in expense structure. For the return of the Fund’s other series (if applicable), please refer to the “Past Performance” section.

Asset allocation was the primary contributor to the Fund’s strong relative performance, contributing 118 basis points (bps) to returns. This was primarily led by an underweighting in federal non-agency bonds. Overweighted positions in New Brunswick and Newfoundland also aided gains.

Security selection detracted one basis point, mostly driven by the underperformance of some of the Fund’s short-dated Ontario bonds.

Yield curve and duration positioning added 18 bps to relative performance. This was due to the Fund’s underweighting in the short end of the curve and overweighting in the long end of the curve in a flattening yield curve environment. The Fund’s shorter-than-Index duration positioning also helped performance, as short-term yields increased.

Pricing and residual factors combined detracted 8 bps from relative performance.

Income received from investments held, excluding net realized and/or unrealized gain (loss) on investments and derivatives, increased due to the results of the Funds’ investment activities, including, but not limited to, those previously discussed for the period in review.

RECENT DEVELOPMENTS

Global central bank liquidity will likely continue to support financial markets and suppress volatility for another quarter, though at a reduced pace. The portfolio managers believe that earnings growth and stimulus from recent tax cuts will further contribute over the first half of 2018. The portfolio managers expect support will be slowly eroded over the year given shifts in central bank policy ending ultra-loose global monetary policy and the benefits from tax cuts peaking.

The US Federal Reserve (Fed) began to normalize its balance sheet during the fourth quarter in small initial increments, which will double to US\$20 billion/month in the first quarter of 2018. This amount is manageable, from a market perspective. However, the pace will accelerate during 2018 so that by year end, the Fed will have removed a substantial portion of the purchases made during the first round of quantitative easing, representing a meaningful tightening of policy. This could be a catalyst for higher volatility.

While core inflation may be increasing in both Canada and the United States, global disinflation remains the overarching theme. Therefore, the portfolio managers expect that inflation will remain benign over the upcoming quarter. The portfolio managers also expect that the Fed will raise rates later in the year after the change in Fed leadership is solidified. As a result, following a near-term steepening, the US yield curve should flatten.

In Canada, the portfolio managers see a significant amount of good news priced in to both yields, especially short rates, and the Canadian dollar. Short rates are near their 6.5-year peak, and the Canadian yield curve has not been this flat since late 2007. Negative surprises should lead to the unwinding of a portion of the recent currency trend, likely steepening the yield curve in the process.

Relative to global interest rates, the North American fixed income markets continue to offer some of the highest yields across developed markets, making them an attractive destination for capital. This mitigates the likelihood of large and sustained moves higher in yield.

FORWARD-LOOKING STATEMENTS

Investors should take note that certain statements in this report about a fund, including its strategy and expected future performance, are forward-looking. Forward-looking statements are statements that are predictive in nature, depend upon or refer to future events or conditions, or that include words such as “may,” “will,” “should,” “could,” “expect,” “anticipate,” “intend,” “plan,” “believe,” or “estimate” or other similar expressions. Any statement that is made concerning future strategies or performance is also a forward-looking statement. Statements that look forward in time or include anything other than historical information are subject to risks and uncertainties, and actual results, actions or events could differ materially from those set forth in the forward-looking statements.

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Fund can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance. Any number of factors could contribute to differing results, including, among other things, general economic, political and market factors, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings and catastrophic events. This list of factors is not exhaustive. Investors should not place undue reliance on forward-looking information and should be aware that the Fund may not update any forward-looking statements, whether as a result of new information, future events or otherwise.

RELATED PARTY TRANSACTIONS

The Manager is an indirect wholly-owned subsidiary of Franklin Resources, Inc., a global investment management organization known as Franklin Templeton Investments. The Manager is the manager, registrar and transfer agent and a principal distributor of the Fund. The Manager provides or arranges for the provision of these services for day-to-day Fund operations, including the marketing, promotion and distribution of the Fund and portfolio advisory services. In consideration of these management and portfolio advisory services, the Fund pays the Manager a monthly management fee plus applicable taxes, based on

the average net asset value of each series of the Fund (except Series O and OT, as applicable), calculated daily, as set out under Management Fees below.

Franklin Templeton Services, LLC (FTS) provides the Manager with fund accounting and portfolio valuation services in connection with the Fund, and provides certain back office administration services to the Manager. The Administration Fee, as discussed below, covers the cost of the services provided by FTS.

The Manager pays the operating expenses of the Fund, other than certain fund costs—which include, but are not limited to, the cost of compliance with new governmental and regulatory requirements, fees and expenses of the Fund’s Independent Review Committee (IRC), borrowing and interest costs and investor meeting costs (as permitted by Canadian securities regulation)—in exchange for the payment by the Fund of an annual fixed-rate administration fee of 0.10% plus applicable taxes, applied against the average daily net assets of the Fund (“Administration Fee”), except Series O and OT, which have no annual Administration Fee. The Manager will pay all operating expenses of Series O and OT, as applicable, as part of its agreement with each investor. The Manager may, at its discretion, waive a portion of a series’ Administration Fee or absorb certain fund costs.

During the year ended December 31, 2017, the Manager waived fund costs of \$3,000.

As at December 31, 2017, Franklin Quotential Diversified Income Portfolio, Franklin Quotential Balanced Growth Portfolio, Franklin Quotential Diversified Income Corporate Class Portfolio and Franklin Quotential Balanced Income Portfolio, held 23%, 21%, 21% and 15% of the Fund, respectively.

Portfolio Advisor

Franklin Bissett Investment Management (the “Portfolio Advisor”), part of the Manager, provides investment analysis and recommendations and executes or arranges for brokers to execute portfolio transactions.

Principal Distributor

As a principal distributor of the Fund, the Manager markets the Fund and arranges for the sale of the Fund through dealers across Canada. The Manager may retain companies to assist in the sale of certain series of units of the Fund.

The Manager’s affiliate, FTC Investor Services Inc. (“FTC ISI”), also acts as a principal distributor for Series F, O, OT, FT, PF and PF (Hedged) units of the Fund, as applicable.

For acting as a principal distributor of the applicable series, FTC ISI receives an inter-company service fee of 0.20% of the assets under management of the applicable series from the Manager with respect to those series of units.

Registrar and Transfer Agent

In addition to management and portfolio advisory services, the Manager acts as the registrar and transfer agent of the Fund. These services are in the normal course of operations and are covered by the Administration Fee paid by the Fund to the Manager.

Standing Instructions from the Independent Review Committee

The Manager relied on standing instructions from the IRC with respect to the allocation of any operating expenses not covered by the Administration Fee. The Manager relied, or may rely, on standing instructions from the IRC in respect of securities trades amongst mutual funds, investment funds or managed accounts managed by the Manager or an affiliate of the Manager. In both cases, the standing instructions require the Manager to comply with the policies and procedures presented to the IRC with respect to the above matters and to provide periodic reports to the IRC in accordance with NI 81-107.

MANAGEMENT FEES

A portion of the management fee paid by the Fund to the Manager is for trail fees and sales commissions the Manager pays to dealers (“Dealer Compensation”). The trail fees are a percentage of the daily average net asset value of each series of the Fund, which is held by the dealer’s clients. The remaining portion of the management fee is used to pay for portfolio advisory and administrative services related to the provision of portfolio advisory services. The table below outlines the Fund’s annual management fee, as well as the portion of the management fee used to pay for Dealer Compensation and for portfolio advisory services as an approximate percentage of the management fee for each series:

Series	Management Fee (%)	Dealer Compensation (%)*	Investment management, investment management expenses, and other (%)
F	0.50	–	100.00
PF	0.40	–	100.00

*Dealer compensation may include other fees related to distribution, which are not payable directly to dealers.

The management and administration fees for Series O and OT are paid for by the unitholder directly to the Manager as follows:

- First C\$200,000 to under \$2.5 million—0.50%
- Next C\$2.5 million to under \$5 million—0.40%
- C\$5 million and over—0.30%

Certain institutional investors may negotiate the management and administration fees by written agreement with Franklin Templeton Investments.

FRANKLIN BISSETT CANADIAN GOVERNMENT BOND FUND
MANAGEMENT REPORT OF FUND PERFORMANCE
Series F (AS AT DECEMBER 31, 2017)

FINANCIAL HIGHLIGHTS

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the fiscal periods ended December 31.

Net assets per unit (1)	2017	2016
Net assets – beginning of period	\$9.77	\$10.00
Increase (decrease) from operations:		
Total revenue	0.29	0.04
Total expenses	(0.07)	(0.01)
Realized gains (losses) for the period	–	–
Unrealized gains (losses) for the period	0.05	(0.23)
Total increase (decrease) from operations (2)	0.27	(0.20)
Distributions:		
From income (excluding dividends)	(0.25)	(0.03)
From dividends	–	–
From capital gains	(0.01)	–
Returns of capital	–	–
Total annual distributions (3)	(0.26)	(0.03)
Net assets – end of period	\$9.79	\$9.77
Ratios and supplemental data:	2017	2016
Total net asset value (\$ millions) (1)	\$0.04	\$–
Number of units outstanding	3,960	500
Management expense ratio (2)	0.68%	0.68%
Management expense ratio before waivers or absorptions	0.68%	0.68%
Portfolio turnover rate (3)	123.20%	67.09%
Net asset value per unit	\$9.79	\$9.77

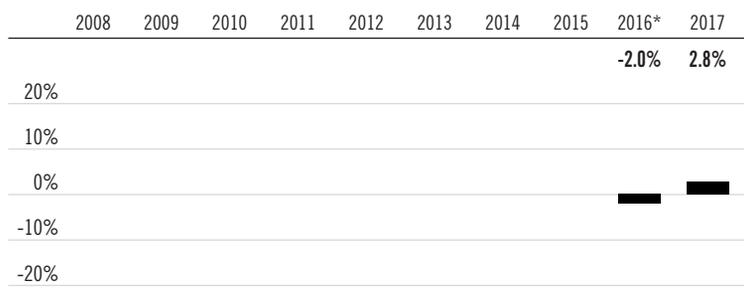

For explanatory notes, please refer to “Explanatory Notes to Financial Highlights” at the end of the section.

PAST PERFORMANCE

The following information assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund and does not take into account sales, redemption, distribution or other optional charges that would have reduced returns. Past performance does not necessarily indicate how the Fund will perform in the future.

Year-by-Year Returns

The bar chart shows the Fund's annual performance for each of the years shown, and illustrates how the investment Fund's performance has changed from year to year. In percentage terms, the bar chart indicates how much an investment made on January 1 would have grown or decreased by the December 31 of each year shown.

*2016 Series F return: November 14 to December 31

Annual Compound Returns

The table shows the annual compound total returns for each of the periods shown ended December 31, 2017. The returns are compared against the benchmark(s) over the same period.‡

	1 Year	3 Years	5 Years	10 Years	Since Inception
Series F Units	2.8%	N/A	N/A	N/A	2.2%
FTSE TMX Canada All Government Bond Index	2.2%	N/A	N/A	N/A	1.5%

NOTES TO FINANCIAL HIGHLIGHTS

Net Assets per Unit:

- (1) This information is derived from the Fund's audited annual financial statements. In the period a fund or series is established, the financial information is provided from the date of inception to the end of the period. In cases where the net assets per unit presented in the financial statements differ from the net asset value calculated for Fund pricing purposes, an explanation of these differences can be found in the notes to the financial statements.
- (2) Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease in net assets from operations is based on the weighted average number of units outstanding over the fiscal period. This table is not intended to be a reconciliation of opening and closing net assets per unit.
- (3) Distributions were paid in cash or reinvested in additional units of the Fund or both, and exclude distributions of management fee reductions to unitholders.

Ratios and Supplemental Data:

- (1) This information is provided as at the period-end of the year shown.
- (2) Management expense ratio is based on total expenses for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.
- (3) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling each security in its portfolio once in the course of the relevant period. The higher the portfolio turnover rate in the period, the greater the trading costs payable by the Fund and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund.

OTHER FUND INFORMATION

Reported year-by-year returns for past years may be revised, based on the results of recalculations, audits and/or other historical review processes. Such revisions are considered immaterial to performance disclosure unless otherwise stated.

Series I and V, as applicable, are presently capped (closed to new investors). Investors who currently own units of Series I and Series V may continue to purchase additional units in those series. These series may become available for purchase by new investors at the discretion of the Manager.

BENCHMARK(S) INFORMATION

FTSE TMX Canada All Government Bond Index is made up of government and government-guaranteed bonds with an investment-grade rating and a remaining effective term to maturity of at least one year.
