Boutique specialization backed by global strength

Everything we do at Franklin Templeton is focused on delivering better client outcomes. That’s why we’ve built a global investment firm that aims to offer you the best of both worlds: global strength and boutique specialization.

We bring together an experienced collection of independent specialist investment managers to provide our clients deep expertise and specialization within and across asset classes, investment styles, and geographies. We boast extensive multi-asset capabilities. And we offer hundreds of strategies across active, smart beta and passive approaches—in a full range of vehicles. All this lets us provide options best suited to the unique needs of every client—institutional or individual.

Guided by long-term value creation

We have the financial strength to think well beyond next quarter. To keep developing innovative products and tools that will help investors seize on tomorrow’s opportunities. And to try to do the right thing for our clients—in both the short and long terms. Because our success is measured by your success.

Extensive investment capabilities

Building a global ETF platform

Franklin LibertyShares® ETFs help investors pursue their desired outcomes. Our ETFs include actively managed, smart beta and passive funds that span multiple asset classes and regions and leverage the global investment management platform of experts.

Global perspective shaped by local expertise

Franklin Templeton pioneered international investing over 60 years ago, and our expertise in emerging markets spans more than a quarter of a century. Our investment professionals are on the ground across the globe, spotting investment ideas and potential risks firsthand and sharing their best thinking across our global research network. This firsthand understanding of local culture, companies and economies makes us uniquely positioned to spot smart global investments others might miss.

Responsible investing for better client outcomes

We enhance traditional financial analysis by embedding ESG best practices and analytics in our investment processes to help manage risk, identify new investment opportunities, and seek to enhance returns over the long term.
