

# Franklin Innovation Fund ETF Series-CAD (FINO)

Growth | Factsheet as of March 31, 2026

## Investment Overview

The Fund seeks capital appreciation by investing primarily in companies with maintainable innovation-driven growth prospects.

## Fund Highlights

- **Access to International Markets.** The Fund can invest in companies located anywhere in the world. We consider the Fund to be a diversified Global Growth Equity strategy.
- **High-Growth Positioning.** The portfolio is often distinguished by higher estimated long-term earnings growth relative to major US Equity benchmarks, aiming to provide exposure to pockets of growth and dynamic technology that the index may not.
- **Thematic Exposure.** Currently, we have identified five innovation themes to anchor our portfolio: Global E-Commerce, Genetic Breakthroughs, Intelligent Machines, New Finance and Exponential Data. We seek to look beyond macroeconomic indicators and short-term company fundamentals, and instead harness the potential wealth creation power of these innovations and others over a long-term investment horizon.
- **A Proven Investment Process.** This Fund's strategy has focused on investing in "Dynamic Technology" since 1968.
- **Advantaged Location.** The portfolio managers and investment team are in Silicon Valley, California - at the center of a network of industry, finance, academic and other contacts dedicated to world-leading innovation.

## Total Returns

**Performance data represents past performance, which does not guarantee future results.** Current performance may differ from figures shown. Investment return and principal value will fluctuate with market conditions, and you may have a gain or loss when you sell your units.

Commissions, trailing commissions, management fees, brokerage fees and expenses may be associated with investments in mutual funds and ETFs. Please read the prospectus and fund fact/ETF facts document before investing. ETFs trade like stocks, fluctuate in market value and may trade at prices above or below the ETF's net asset value. Brokerage commissions and ETF expenses will reduce returns. Performance of an ETF may vary significantly from the performance of an index, as a result of transaction costs, expenses, and other factors. Indicated rates of return are historical annual compounded total returns for the period indicated, including changes in unit value and reinvestment distributions, and do not take into account any charges or income taxes payable by any security holder that would have reduced returns. Mutual funds and ETFs are not guaranteed. Their values change frequently. Past performance may not be repeated.

**Glossary**

**Weighted Average Market Capitalization:** A determination of a company's value, calculated by multiplying the total number of company stock shares outstanding by the price per share. For a portfolio, the value represents a weighted average based on the stocks held. **Price to Book:** The price per share of a stock divided by its book value (i.e., net worth) per share. For a portfolio, the value represents a weighted average of the stocks it holds. **Price to Earnings (12-Month Trailing)** is the share price of a stock, divided by its per-share earnings over the past year. For a portfolio, the value represents a weighted average of the stocks it holds.
