

Franklin ClearBridge Canadian Equity Fund Series PA-CAD

Growth | Factsheet as of February 28, 2026

Investment Overview

The fund seeks long-term capital appreciation by investing primarily in a diversified portfolio of mid- to large-cap Canadian equities.

Fund Highlights

- **Canadian Focus.** Ideal for investors seeking 100% focus on Canadian equities with a bias towards dividend payers and growers that typically outperform over the long term.
- **GARP-style investing.** The fund's GARP approach to investing uncovers growth-oriented companies at reasonable valuations. This process enables the fund to access many quality Canadian companies overlooked by strict value and growth managers.

Total Returns

	Cumulative				Average Annual					Inception
	1-Mo	3-Mo	6-Mo	YTD	1 Year	3-Yr	5-Yr	10-Yr	Inception	Date

Series PA - CAD	18.66	14.72	7.73	0.80	26.55	-2.68	—	—	—	—

Performance data represents past performance, which does not guarantee future results. Current performance may differ from figures shown. Investment return and principal value will fluctuate with market conditions, and you may have a gain or loss when you sell your units.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus or fund facts document before investing. The indicated rates of return are historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently, and past performance may not be repeated.

Glossary

Turnover is a measure of the fund's trading activity which represents the portion of the fund's holdings that has changed over a twelve-month period through the fiscal year end. There is no assurance that the fund will maintain its current level of turnover. **Weighted Average Market Capitalization:** A determination of a company's value, calculated by multiplying the total number of company stock shares outstanding by the price per share. For a portfolio, the value represents a weighted average based on the stocks held. **Price to Book:** The price per share of a stock divided by its book value (i.e., net worth) per share. For a portfolio, the value represents a weighted average of the stocks it holds. **Price to Earnings (12-Month Trailing)** is the share price of a stock, divided by its per-share earnings over the past year. For a portfolio, the value represents a weighted average of the stocks it holds.
