

# Templeton Global Bond Fund Series A-Hedged-CAD

Global Fixed Income | Factsheet as of October 31, 2025

## Investment Overview

The fund seeks high current income with capital appreciation by investing primarily in fixed-income securities and preferred shares issued around the world. The fund may not invest more than 25% of the total value of the invested assets (excluding cash) in a particular industry.

## Fund Highlights

- **Ability to Seek Attractive Yields:** The Fund takes a truly global approach to seek attractive yields with higher quality through investments in sovereign debt.
- **Differentiated Return:** High conviction active country selection and select global currency management from a team of experts offers the potential for differentiated sources of return.
- **Correlation Benefits in a Wider Portfolio Context:** The Templeton Global Macro investment team's differentiated approach has resulted in returns that have had moderate to low correlations with other asset classes historically.

## Total Returns

|                       | Cumulative |      |      |       | Average Annual |      |      |       |           | Inception |
|-----------------------|------------|------|------|-------|----------------|------|------|-------|-----------|-----------|
|                       | 1-Mo       | 3-Mo | 6-Mo | YTD   | 1 Year         | 3-Yr | 5-Yr | 10-Yr | Inception | Date      |
| Series A-Hedged - CAD | 0.28       | 3.52 | 5.73 | 13.19 | 7.15           | 5.55 | —    | —     | -1.69     | 6/25/2021 |

## Calendar Year Returns (%)

|                       | 2024  | 2023 | 2022  | 2021 | 2020 | 2019 | 2018 | 2017 | 2016 | 2015 |

**Performance data represents past performance, which does not guarantee future results.** Current performance may differ from figures shown. Investment return and principal value will fluctuate with market conditions, and you may have a gain or loss when you sell your units.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus or fund facts document before investing. The indicated rates of return are historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently, and past performance may not be repeated.

## Portfolio Management

|                        | Location                  | Years with Firm | Years of Experience |
|------------------------|---------------------------|-----------------|---------------------|
| Michael Hasenstab, PhD | California, United States | 26              | 30                  |
| Calvin Ho, PhD         | California, United States | 20              | 20                  |

## Growth of \$10,000

Inception through October 31, 2025, Excluding Effects of Sales Charges

| Cash & Cash Equivalents | 8.72  |

Glossary

**Yield to Maturity (‘YTM’):** is the rate of return anticipated on a bond if it is held until the maturity date. YTM is considered a long-term bond yield expressed as an annual rate. The calculation of YTM takes into account the current market price, par value, coupon interest rate and time to maturity. It is also assumed that all coupons are reinvested at the same rate. Yield figures quoted should not be used as an indication of the income that has or will be received. Yield figures are based on the portfolio's underlying holdings and do not represent a payout of the portfolio. **Yield to Maturity is calculated without the deduction of fees and expenses.** **Turnover** is a measure of the fund's trading activity which represents the portion of the fund's holdings that has changed over a twelve-month period through the fiscal year end. There is no assurance that the fund will maintain its current level of turnover. **Average Credit Quality:** The average credit quality reflects the holdings of the underlying issues, based on the size of each holding and ratings assigned to each based on rating agency assessments of its creditworthiness. **Weighted Average Maturity:** An estimate of the number of years to maturity, taking the possibility of early payments into account, for the underlying holdings. **Effective Duration** is a duration calculation for bonds with embedded options. Effective duration takes into account that expected cash flows will fluctuate as interest rates change. Duration measures the sensitivity of price (the value of principal) of a fixed-income investment to a change in interest rates. The higher the duration number, the more sensitive a fixed-income investment will be to interest rate changes. **Yield to Worst:** The yield to maturity if the worst possible bond repayment takes place. If market yields are higher than the coupon, the yield to worst would assume no prepayment. If market yields are below the coupon, the yield to worst would assume prepayment. In other words, yield to worst assumes that market yields are unchanged. Normally this value is not aggregated since it varies but if a weighted average value is used for a fund then the figure will reflect the values of the underlying issues, based on the size of each holding. **Yield to Worst is calculated without the deduction of fees and expenses.**

Portfolio Data Information

**Exposure:** Notional exposure figures are estimated and are intended to show the portfolio's direct exposure to securities and indirect exposure, through derivatives. Direct and indirect exposures are subject to change over time and methodologies for calculating indirect exposures vary by derivative type. Portfolio breakdown percentages may not total 100% and may be negative due to rounding, use of derivatives, unsettled trades or other factors.

**Credit Quality** is a measure of a bond issuer's ability to repay interest and principal in a timely manner. The credit ratings shown are based on each portfolio security's rating as provided by Standard and Poor's, Moody's Investors Service and/or Fitch Ratings, Ltd. and typically range from AAA (highest) to D (lowest), or an equivalent and/or similar rating. For this purpose, the manager assigns each security the middle rating from these three agencies. When only two agencies provide ratings, the lower of the two ratings will be assigned. When only one agency assigns a rating, that rating will be used. Foreign government bonds without a specific rating are assigned a country rating, if available. Securities that are unrated by all three agencies are reflected as such. The credit quality of the investments in the Fund's portfolio does not apply to the stability or safety of the Fund. These ratings are updated monthly and may change over time. **Please note, the Fund itself has not been rated by an independent rating agency.**

**Important Information**

Mutual fund securities are not covered by the Canada Deposit Insurance Corporation or by any other government deposit insurer. There can be no assurances that the fund will be able to maintain its net asset value per security at a constant amount or that the full amount of your investment in the fund will be returned to you.
