FRANKLIN TEMPLETON | ClearBridge

Franklin ClearBridge Canadian Dividend Fund Series FT-CAD

Growth | Factsheet as of September 30, 2026

Effective April 1, 2026, the fund changed its primary benchmark to the Linked S&P/TSX Composite Dividend Total Return Index.

Investment Overview

The fund seeks long-term capital appreciation by investing primarily in dividend-paying or income-producing Canadian securities, including common shares, income trust units and preferred shares.
Portfolio managers look for quality companies at reasonable prices that have a proven ability to deliver a consistent and growing level of dividends over time.

Fund Highlights

- **Quality investments offering high yield dividends.** The fund invests in businesses with low earnings volatility and solid dividend records.
- **Diversified stream of tax-efficient income,** With a regular stream of monthly income that may include dividends and Return of Capital, the fund's distributions are more tax-efficient than regular interest income.

Total Returns

	Cumulative					Average Annual				Inception
	1-Mo	3-Mo	6-Mo	YTD	1 Year	3-Yr	5-Yr	10-Yr	Inception	Date

Performance data represents past performance, which does not guarantee future results. Current performance may differ from figures shown. Investment return and principal value will fluctuate with market conditions, and you may have a gain or loss when you sell your units.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus or fund facts document before investing. The indicated rates of return are historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently, and past performance may not be repeated.

Glossary

Turnover is a measure of the fund's trading activity which represents the portion of the fund's holdings that has changed over a twelve-month period through the fiscal year end. There is no assurance that the fund will maintain its current level of turnover. **Weighted Average Market Capitalization:** A determination of a company's value, calculated by multiplying the total number of company stock shares outstanding by the price per share. For a portfolio, the value represents a weighted average based on the stocks held. **Price to Book:** The price per share of a stock divided by its book value (i.e., net worth) per share. For a portfolio, the value represents a weighted average of the stocks it holds. **Price to Earnings (12-Month Trailing)** is the share price of a stock, divided by its per-share earnings over the past year. For a portfolio, the value represents a weighted average of the stocks it holds. **Dividend Yield** is the annual dividend received on an equity security as a percentage of the price. For a portfolio, the value represents a weighted average of the stocks it holds. It should not be used as an indication of the income received from this portfolio. **Dividend Yield is calculated without the deduction of fees and expenses.**
