

# Franklin ClearBridge Dividend Income Fund Series I-CAD

Asset Allocation | Factsheet as of April 30, 2026

Effective April 1, 2026, the fund changed the components and allocation of its custom benchmark.

## Investment Overview

The fund seeks long-term capital appreciation by investing primarily in dividend-paying or income-producing Canadian securities, including common shares, income trust units and preferred shares. Portfolio managers look for quality companies at reasonable prices that have a proven ability to deliver a consistent and growing level of dividends over time

## Fund Highlights

- **Focus on dividend-paying equities.** The fund is suitable for investors seeking a regular stream of monthly income, which may be particularly attractive during periods of market uncertainty.
- **Opportunities through diversification.** Seeks to generate high current income by investing primarily in Canadian and American dividend-paying preferred and common stocks and, from time to time, bonds, up to a maximum of 25% of the fund's total assets.
- **Capital appreciation potential.** By primarily investing in dividend-paying stocks as well being more heavily weighted in common shares than preferred shares, the fund offers the potential for long-term capital appreciation and stable dividends.

## Total Returns

	Cumulative				Average Annual					Inception	
	1-Mo	3-Mo	6-Mo	YTD	1 Year	3-Yr	5-Yr	10-Yr	Inception	Date

**Performance data represents past performance, which does not guarantee future results.** Current performance may differ from figures shown. Investment return and principal value will fluctuate with market conditions, and you may have a gain or loss when you sell your units.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus or fund facts document before investing. The indicated rates of return are historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently, and past performance may not be repeated.

**Glossary**

**Yield to Maturity ('YTM')**: is the rate of return anticipated on a bond if it is held until the maturity date. YTM is considered a long-term bond yield expressed as an annual rate. The calculation of YTM takes into account the current market price, par value, coupon interest rate and time to maturity. It is also assumed that all coupons are reinvested at the same rate. Yield figures quoted should not be used as an indication of the income that has or will be received. Yield figures are based on the portfolio's underlying holdings and do not represent a payout of the portfolio. **Yield to Maturity is calculated without the deduction of fees and expenses.** **Turnover** is a measure of the fund's trading activity which represents the portion of the fund's holdings that has changed over a twelve-month period through the fiscal year end. There is no assurance that the fund will maintain its current level of turnover. **Price to Book**: The price per share of a stock divided by its book value (i.e., net worth) per share. For a portfolio, the value represents a weighted average of the stocks it holds. **Weighted Average Maturity**: An estimate of the number of years to maturity, taking the possibility of early payments into account, for the underlying holdings. **Yield to Worst**: The yield to maturity if the worst possible bond repayment takes place. If market yields are higher than the coupon, the yield to worst would assume no prepayment. If market yields are below the coupon, the yield to worst would assume prepayment. In other words, yield to worst assumes that market yields are unchanged. Normally this value is not aggregated since it varies but if a weighted average value is used for a fund then the figure will reflect the values of the underlying issues, based on the size of each holding. **Yield to Worst is calculated without the deduction of fees and expenses.**
