

Franklin Quotential Diversified Equity Portfolio Series T-CAD

Target Risk | Factsheet as of February 28, 2026

Investment Overview

Long-term capital appreciation by investing primarily in a diversified mix of equity mutual funds.

Fund Highlights

- **Actively Managed for Long-Term Growth** Portfolio Managers focus on a long-term, strategic asset allocation of 100% equity, providing a foundation for a moderately aggressive risk/return profile.
- **Capitalize on Short-Term Opportunities** The portfolio capitalizes on opportunities in two ways: 1) Shifting the allocation towards more attractive asset classes based on the market environment, and 2) Adjusting the combination of regions, market caps, styles, and sectors appropriate for the current economic and market conditions.

Total Returns

	Cumulative				Average Annual					Inception
	1-Mo	3-Mo	6-Mo	YTD	1 Year	3-Yr	5-Yr	10-Yr	Inception	Date
Series T - CAD	1.82	3.04	10.34	3.90	14.05	16.64	10.04	9.35	5.65	6/14/2007

Calendar Year Returns (%)

	2025	2024	2023	2022	2021	2020	2019	2018	2017	2016
Series T - CAD	13.14	22.48	14.98	-13.94	14.36	12.83	17.88	-7.43	9.68	0.59

Performance data represents past performance, which does not guarantee future results. Current performance may differ from figures shown. Investment return and principal value will fluctuate with market conditions, and you may have a gain or loss when you sell your units.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus or fund facts document before investing. The indicated rates of return are historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently, and past performance may not be repeated.

Series T distributions are automatically reinvested unless otherwise requested. Series T may also pay a distribution that must be reinvested in December, consisting of income and capital gains.

Glossary

Turnover is a measure of the fund's trading activity which represents the portion of the fund's holdings that has changed over a twelve-month period through the fiscal year end. There is no assurance that the fund will maintain its current level of turnover. **Dividend Yield** is the annual dividend received on an equity security as a percentage of the price. For a portfolio, the value represents a weighted average of the stocks it holds. It should not be used as an indication of the income received from this portfolio. **Dividend Yield is calculated without the deduction of fees and expenses.**

If you require additional explanation around the terms used in this document, please refer to <https://www.franklintempleton.ca/en-ca/help/glossary>.

Portfolio Data Information

Holdings are provided for information purposes only and should not be deemed a recommendation to buy or sell the securities mentioned.

Important Information

Mutual fund securities are not covered by the Canada Deposit Insurance Corporation or by any other government deposit insurer. There can be no assurances that the fund will be able to maintain its net asset value per security at a constant amount or that the full amount of your investment in the fund will be returned to you.

Maximum target annual distribution rate on Series T varies between 5% to 8%, set for the individual fund or portfolio. Annual target distributions are subject to change at the discretion of Franklin Templeton Investments. Investors may choose their desired Return of Capital (ROC) cash payout rate, the remainder will be reinvested in additional Series T units/shares of the same fund or portfolio. An investor's adjusted cost base (ACB) will be reduced by the amount of any ROC payments. If the investor's ACB goes below zero, they will have to pay capital gains tax on any further ROC distributions. Series T may also pay an annual income distribution and capital gains which must be reinvested but will be taxable in the year received. The payment of income distributions is not guaranteed and may fluctuate. Income distributions and ROC cash flow payments are not an indication of performance, rate of return, or yield. If distributions paid by a fund are greater than the return of the fund, the value of the investor's investment will decrease. Investors should obtain advice from a qualified tax specialist on taxation matters.
