

Franklin U.S. Rising Dividends Fund Series FT-CAD

Large Cap | Factsheet as of January 31, 2026

Investment Overview

This Fund seeks to achieve long-term capital appreciation by investing primarily in American equities, with at least 80% of net assets in companies that have paid consistently rising dividends.

Fund Highlights

- **A core U.S. holding.** The fund is an ideal solution for investors seeking a core U.S. equity holding for their portfolios. The fund is designed to offer investors long-term growth and performance through dividend-paying U.S. equities.
- **Reinvesting for growth.** The fund's mandate focuses on investing in companies with a history of consistent and substantial dividend increases and that have the potential for higher future cash flows.

Performance data represents past performance, which does not guarantee future results. Current performance may differ from figures shown. Investment return and principal value will fluctuate with market conditions, and you may have a gain or loss when you sell your units.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus or fund facts document before investing. The indicated rates of return are historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently, and past performance may not be repeated.

Glossary

Turnover is a measure of the fund's trading activity which represents the portion of the fund's holdings that has changed over a twelve-month period through the fiscal year end. There is no assurance that the fund will maintain its current level of turnover. **Weighted Average Market Capitalization:** A determination of a company's value, calculated by multiplying the total number of company stock shares outstanding by the price per share. For a portfolio, the value represents a weighted average based on the stocks held. **Price to Book:** The price per share of a stock divided by its book value (i.e., net worth) per share. For a portfolio, the value represents a weighted average of the stocks it holds. **Price to Earnings (12-Month Trailing)** is the share price of a stock, divided by its per-share earnings over the past year. For a portfolio, the value represents a weighted average of the stocks it holds.
