

Franklin International Core Equity Fund Series F-CAD

Blend | Factsheet as of February 28, 2026

Investment Overview

For investors who seek long-term capital appreciation by investing primarily in a diversified portfolio of non-North American developed market international equities designed to serve as the core of their equity allocation.

Fund Highlights

- Aims to deliver more consistent performance through core allocations with low tracking error.
- Style factor diversification complemented with research insights of specialized investment managers across Franklin Templeton.
- Developed and managed by seasoned quantitative research analysts and portfolio managers.

Performance

As this fund is less than 1 year old, securities regulations prevents us from disclosing its performance.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus or fund facts document before investing. The indicated rates of return are historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently, and past performance may not be repeated.

Effective January 1, 2026, Management fee will be waived from 0.25% to 0.22% until December 31, 2026. For additional information, please consult the prospectus. Series F is available to investors participating in programs that do not require Franklin Templeton to incur distribution costs in the form of trailing commissions to dealers. As a consequence, the management fee on Series F is lower than on Series A.

Glossary

Turnover is a measure of the fund's trading activity which represents the portion of the fund's holdings that has changed over a twelve-month period through the fiscal year end. There is no assurance that the fund will maintain its current level of turnover. **Weighted Average Market Capitalization:** A determination of a company's value, calculated by multiplying the total number of company stock shares outstanding by the price per share. For a portfolio, the value represents a weighted average based on the stocks held. **Price to Book:** The price per share of a stock divided by its book value (i.e., net worth) per share. For a portfolio, the value represents a weighted average of the stocks it holds. **Price to Earnings (12-Month Trailing)** is the share price of a stock, divided by its per-share earnings over the past year. For a portfolio, the value represents a weighted average of the stocks it holds.
