

Franklin Brandywine Global Balanced Fund Series T-CAD

Balanced | Factsheet as of March 31, 2026

Effective May 1, 2025, the Franklin Brandywine Global Sustainable Balanced Fund changed its name to Franklin Brandywine Global Balanced Fund and the Custom Franklin Brandywine Global Sustainable Balanced Benchmark was renamed Custom Franklin Brandywine Global Balanced Benchmark. Effective at close of business December 6, 2024, Templeton Sustainable Global Balanced Fund merged into Franklin Brandywine Global Sustainable Balanced Fund.

Investment Overview

The fund seeks to generate current income and long-term capital appreciation by investing primarily in debt instruments and equity securities of issuers anywhere in the world using a sustainable investing approach.

Fund Highlights

- **Dual Approach:** Pairs key macroeconomic themes driving asset prices with deep fundamental analysis, aligning valuations with risk.
- **Differentiated Value Investing:** Takes active, high conviction positions in securities with significant valuation anomalies along with identifiable catalysts for price mean reversion.
- **ESG Approach:** ESG analysis is fully embedded into the research and investment process; uses a proprietary rating system, and either limits or completely excludes the weakest scoring securities from the portfolio.

Benchmark(s)

Custom Franklin Brandywine Global Balanced Benchmark

Performance data represents past performance, which does not guarantee future results. Current performance may differ from figures shown. Investment return and principal value will fluctuate with market conditions, and you may have a gain or loss when you sell your units.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus or fund facts document before investing. The indicated rates of return are historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently, and past performance may not be repeated.

The inception date of the fund is September 20, 2022. After Templeton Sustainable Global Balanced Fund merged into Franklin Brandywine Global Sustainable Balanced Fund, effective at close of business December 6, 2024, the performance data of the continuing fund was reset. This initiated a new performance inception date of Franklin Brandywine Global Sustainable Balanced Fund starting December 9, 2024. As Templeton Sustainable Global Balanced Fund (larger terminating fund) merged into Franklin Brandywine Global Sustainable Balanced Fund (smaller continuing fund), the merger was a material change, which triggered a reset to the performance calculation start date of the continuing fund to be compliant.

Series T distributions are automatically reinvested unless otherwise requested. Series T may also pay a distribution that must be reinvested in December, consisting of income and capital gains.

Growth of \$10,000

Inception through March 31, 2026, Excluding Effects of Sales Charges

Glossary

Yield to Maturity ('YTM'): is the rate of return anticipated on a bond if it is held until the maturity date. YTM is considered a long-term bond yield expressed as an annual rate. The calculation of YTM takes into account the current market price, par value, coupon interest rate and time to maturity. It is also assumed that all coupons are reinvested at the same rate. Yield figures quoted should not be used as an indication of the income that has or will be received. Yield figures are based on the portfolio's underlying holdings and do not represent a payout of the portfolio. **Yield to Maturity is calculated without the deduction of fees and expenses.** **Turnover** is a measure of the fund's trading activity which represents the portion of the fund's holdings that has changed over a twelve-month period through the fiscal year end. There is no assurance that the fund will maintain its current level of turnover. **Price to Book**: The price per share of a stock divided by its book value (i.e., net worth) per share. For a portfolio, the value represents a weighted average of the stocks it holds. **Price to Earnings (12-Month Trailing)** is the share price of a stock, divided by its per-share earnings over the past year. For a portfolio, the value represents a weighted average of the stocks it holds. **Weighted Average Maturity**: An estimate of the number of years to maturity, taking the possibility of early payments into account, for the underlying holdings. **Effective Duration** is a duration calculation for bonds with embedded options. Effective duration takes into account that expected cash flows will fluctuate as interest rates change. Duration measures the sensitivity of price (the value of principal) of a fixed-income investment to a change in interest rates. The higher the duration number, the more sensitive a fixed-income investment will be to interest rate changes. **Yield to Worst**: The yield to maturity if the worst possible bond repayment takes place. If market yields are higher than the coupon, the yield to worst would assume no prepayment. If market yields are below the coupon, the yield to worst would assume prepayment. In other words, yield to worst assumes that market yields are unchanged. Normally this value is not aggregated since it varies but if a weighted average value is used for a fund then the figure will reflect the values of the underlying issues, based on the size of each holding. **Yield to Worst is calculated without the deduction of fees and expenses.**

Portfolio Data Information

Holdings are provided for information purposes only and should not be deemed a recommendation to buy or sell the securities mentioned.

Important Information

Mutual fund securities are not covered by the Canada Deposit Insurance Corporation or by any other government deposit insurer. There can be no assurances that the fund will be able to maintain its net asset value per security at a constant amount or that the full amount of your investment in the fund will be returned to you.

Maximum target annual distribution rate on Series T varies between 5% to 8%, set for the individual fund or portfolio. Annual target distributions are subject to change at the discretion of Franklin Templeton Investments. Investors may choose their desired Return of Capital (ROC) cash payout rate, the remainder will be reinvested in additional Series T units/shares of the same fund or portfolio. An investor's adjusted cost base (ACB) will be reduced by the amount of any ROC payments. If the investor's ACB goes below zero, they will have to pay capital gains tax on any further ROC distributions. Series T may also pay an annual income distribution and capital gains which must be reinvested but will be taxable in the year received. The payment of income distributions is not guaranteed and may fluctuate. Income distributions and ROC cash flow payments are not an indication of performance, rate of return, or yield. If distributions paid by a fund are greater than the return of the fund, the value of the investor's investment will decrease. Investors should obtain advice from a qualified tax specialist on taxation matters.
