

Franklin Quotential Diversified Equity Portfolio Series F-CAD

Target Risk | Factsheet as of February 28, 2026

Investment Overview

Long-term capital appreciation by investing primarily in a diversified mix of equity mutual funds.

Fund Highlights

- **Actively Managed for Long-Term Growth** Portfolio Managers focus on a long-term, strategic asset allocation of 100% equity, providing a foundation for a moderately aggressive risk/return profile.
- **Capitalize on Short-Term Opportunities** The portfolio capitalizes on opportunities in two ways: 1) Shifting the allocation towards more attractive asset classes based on the market environment, and 2) Adjusting the combination of regions, market caps, styles, and sectors appropriate for the current economic and market conditions.

Total Returns

	Cumulative				Average Annual				Inception	
	1-Mo	3-Mo	6-Mo	YTD	1 Year	3-Yr	5-Yr	10-Yr	Inception	Date
Series F - CAD	1.91	3.33	10.96	4.09	15.31	17.95	11.27	10.58	8.10	6/9/2003

Calendar Year Returns (%)

	2025	2024	2023	2022	2021	2020	2019	2018	2017	2016
Series F - CAD	14.40	23.86	16.27	-12.99	15.65	14.05	19.20	-6.31	10.92	1.71

Performance data represents past performance, which does not guarantee future results. Current performance may differ from figures shown. Investment return and principal value will fluctuate with market conditions, and you may have a gain or loss when you sell your units.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus or fund facts document before investing. The indicated rates of return are historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently, and past performance may not be repeated.

Series F is available to investors participating in programs that do not require Franklin Templeton to incur distribution costs in the form of trailing commissions to dealers. As a consequence, the management fee on Series F is lower than on Series A.

Glossary

Turnover is a measure of the fund's trading activity which represents the portion of the fund's holdings that has changed over a twelve-month period through the fiscal year end. There is no assurance that the fund will maintain its current level of turnover. **Dividend Yield** is the annual dividend received on an equity security as a percentage of the price. For a portfolio, the value represents a weighted average of the stocks it holds. It should not be used as an indication of the income received from this portfolio. **Dividend Yield is calculated without the deduction of fees and expenses.**

If you require additional explanation around the terms used in this document, please refer to <https://www.franklintempleton.ca/en-ca/help/glossary>.

Portfolio Data Information

Holdings are provided for information purposes only and should not be deemed a recommendation to buy or sell the securities mentioned.

Important Information

Mutual fund securities are not covered by the Canada Deposit Insurance Corporation or by any other government deposit insurer. There can be no assurances that the fund will be able to maintain its net asset value per security at a constant amount or that the full amount of your investment in the fund will be returned to you.

"ADM" refers to the Investment Advisory Services Fee purchase option for series F, FT, PF, PF (Hedged) and PFT. Please see the simplified prospectus for further details.

This report is not prepared or endorsed by MSCI. Custom Franklin Quotential Diversified Equity Benchmark is currently composed of the MSCI All Country World Index-NR (100%). Net Returns (NR) include income net of tax withholding when dividends are paid.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products with at least a three-year history, and subject to change monthly. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

The Overall Morningstar Rating is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total return, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total return. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Ratings do not take into account the effects of sales charges and loads. Morningstar Rating is for the specified share class(es) only; other classes may have different performance characteristics.
