

Franklin Quotential Diversified Equity Portfolio Series F-CAD

Target Risk | Factsheet as of October 31, 2025

Investment Overview

Long-term capital appreciation by investing primarily in a diversified mix of equity mutual funds.

Fund Highlights

- **Actively Managed for Long-Term Growth** Portfolio Managers focus on a long-term, strategic asset allocation of 100% equity, providing a foundation for a moderately aggressive risk/return profile.
- **Capitalize on Short-Term Opportunities** The portfolio capitalizes on opportunities in two ways: 1) Shifting the allocation towards more attractive asset classes based on the market environment, and 2) Adjusting the combination of regions, market caps, styles, and sectors appropriate for the current economic and market conditions.

Performance data represents past performance, which does not guarantee future results. Current performance may differ from figures shown. Investment return and principal value will fluctuate with market conditions, and you may have a gain or loss when you sell your units.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus or fund facts document before investing. The indicated rates of return are historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently, and past performance may not be repeated.

Series F is available to investors participating in programs that do not require Franklin Templeton to incur distribution costs in the form of trailing commissions to dealers. As a consequence, the management fee on Series F is lower than on Series A.

Glossary

Turnover is a measure of the fund's trading activity which represents the portion of the fund's holdings that has changed over a twelve-month period through the fiscal year end. There is no assurance that the fund will maintain its current level of turnover. **Dividend Yield** is the annual dividend received on an equity security as a percentage of the price. For a portfolio, the value represents a weighted average of the stocks it holds. It should not be used as an indication of the income received from this portfolio. **Dividend Yield is calculated without the deduction of fees and expenses.**
