

Franklin Royce Global Small Cap Premier Fund

A distinctive approach to an attractive asset class

Invests primarily in global small-cap stocks that Royce believes are “premier” small-cap companies, i.e., those with discernible competitive advantages, high returns on invested capital and a sustainable franchise. Global small-cap companies are those similar in size to companies in the MSCI All Country World (ACWI) Small Cap Index.

Why consider this fund?

Higher return potential

Global small-cap stocks have delivered higher returns than global large-cap stocks over multi-year time periods (e.g. three years or more) with less incremental risk compared to large caps than many investors realize.¹

Low research coverage

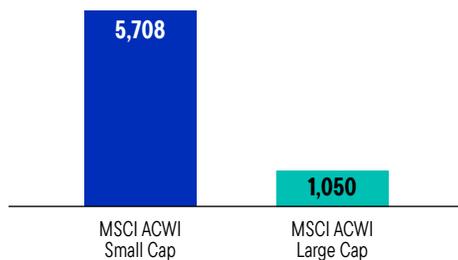

Many global small-cap stocks have little or no analytical coverage from brokerage firms, potentially increasing the opportunity to find high-quality companies selling at valuations that Royce believes understates their true value.

How have global small caps done vs. global large caps?
