

# Is your income portfolio sufficiently diversified?

## Limiting your income investments to domestic GICs and bonds can also limit income opportunities

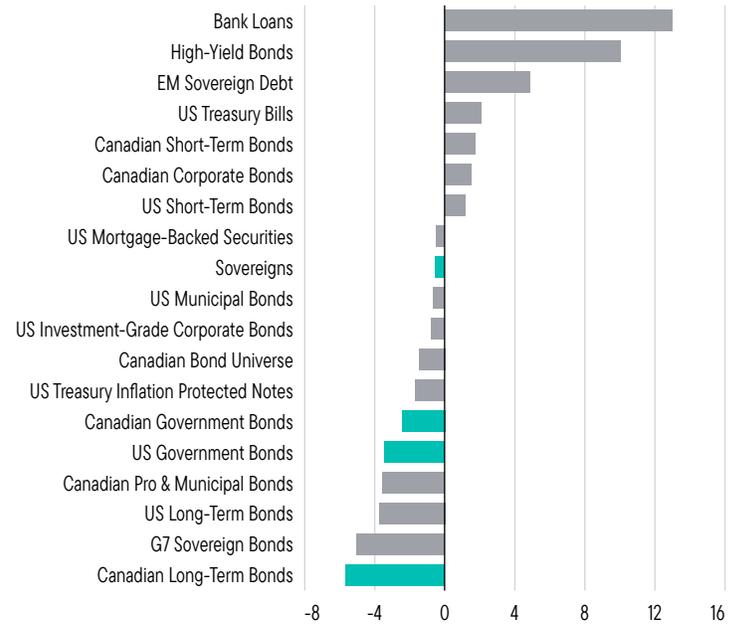

Sources: Morningstar Research Inc., Barclays Capital, Credit Suisse, BofAML, JP Morgan, PC Bond Research, Citi Group, as of December 31, 2025. Based on the current yield of the underlying index.

## In an uncertain rate environment, fixed income portfolios need diversity and active management

### Average Return (%) During Periods of Falling Interest Rates

### Average Return (%) During Periods of Rising Interest Rates

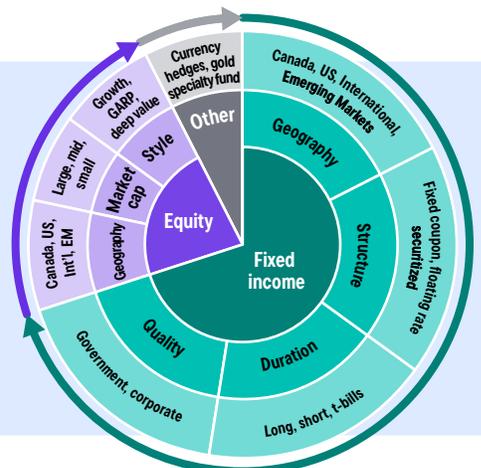

Sources: Morningstar Research Inc., Bloomberg. All returns are based on indices' base currency. Periods of rising/falling interest rates are defined as calendar years when rates on the 10-year US Treasury rose/fell more than 100 basis points for the period from January 1986 to December 2025. Average returns for each asset class only include the years when data is available. See reverse for index definitions.

## The Franklin Quotiential® Diversified Income Portfolio difference

### Multi-level diversification, one investment solution

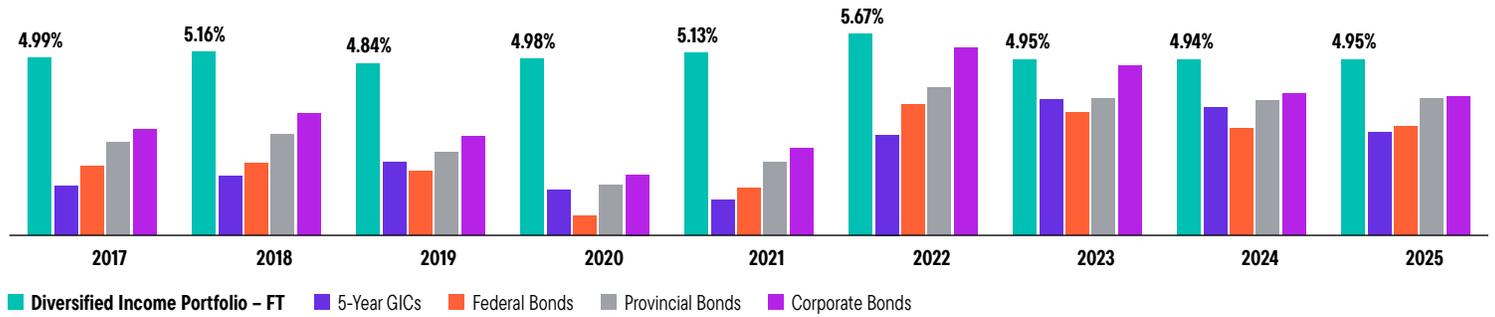

Franklin Quotiential Portfolios draw from a wide range of unique strategies. The Portfolios are structured for broad exposure to each asset class and can include Canadian mutual funds, sub-advised funds and ETFs for targeted allocation exposure. The result is true diversification with minimal investment duplication.

# Get the benefits of Franklin Quotential Diversified Income Portfolio – FT

## Better Cash Flow than GICs and Bonds<sup>1</sup>

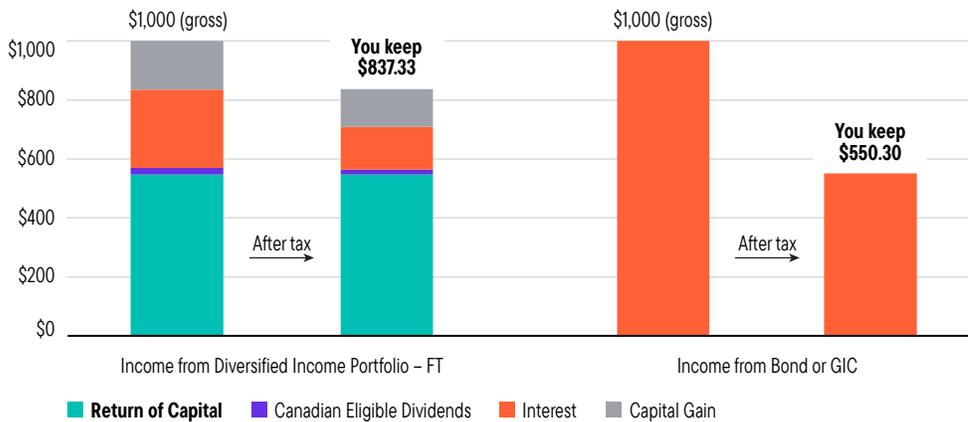

### Distribution Rate/Yield (%)

Sources: Franklin Templeton, PC Bond Research, Morningstar Research, as of December 31, 2025. Annual distribution rate of Franklin Quotential Diversified Income Portfolio – FT; Morningstar 5-year GIC average (5-year GICs); FTSE Canada Federal Bond Index (federal bonds); FTSE Canada Provincial Bond Index (provincial bonds); FTSE Canada Corporate Bond Index (corporate bonds).

## 52% More, Thanks to Tax-Efficient Distributions<sup>2</sup>

1. Cash flows include 12-month trailing distribution rate of Franklin Quotential Diversified Income Portfolio – FT (FQDIP – FT); yields of Morningstar 5-year GIC avg. FTSE Canada Federal Bond Index and FTSE Canada Corporate Bond Index. FQDIP – FT pays monthly distributions that include tax-deferred return of capital (ROC) which can be customized up to a maximum target rate of 5%; the remainder will be reinvested in additional Series FT units of the Portfolio. Maximum rate of distribution may change at the discretion of Franklin Templeton Investments Corp. Any year-end distributions consisting of income and capital gains must be reinvested and are taxable in the year they are received. On June 23, 2008, FQDIP Series A was converted to series FT with a monthly return of capital distribution. The 2008 distribution consists of income received by investors from January 2008–June 2008 and ROC thereafter. The payment of income distributions is not guaranteed and may fluctuate. Income distributions and ROC payments are not an indication of performance, rate of return or yield. If distributions paid by a fund are greater than the return of the fund, the value of the investor's investment will decrease. An investor's adjusted cost base (ACB) will be reduced by the amount of the ROC payments. If the investment's ACB goes below zero, the investor will have to pay capital gains tax on any further ROC distributions. Unrealized capital gain is calculated as (Market Value – ACB). Negative ACB on the Series FT investment is recognized as a capital gain in the year it is received.

2. Calculations based on FQDIP – FT distributions paid over 2025 calendar year. Assume marginal tax rate of 44.97% (Ontario in 2025) and effective rate of 27.53% for Cdn eligible dividends. The indicated rates of return are historical annual compounded total returns including changes in share/unit value and reinvestment of all dividends/distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus or fund facts document before investing. The indicated rates of return are historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.
