

Franklin Quotential® Balanced Income Portfolio

Investment policy statement

As of September 30, 2025

Prepared exclusively for:

Prepared by:

Simple one-step solution for growth and income

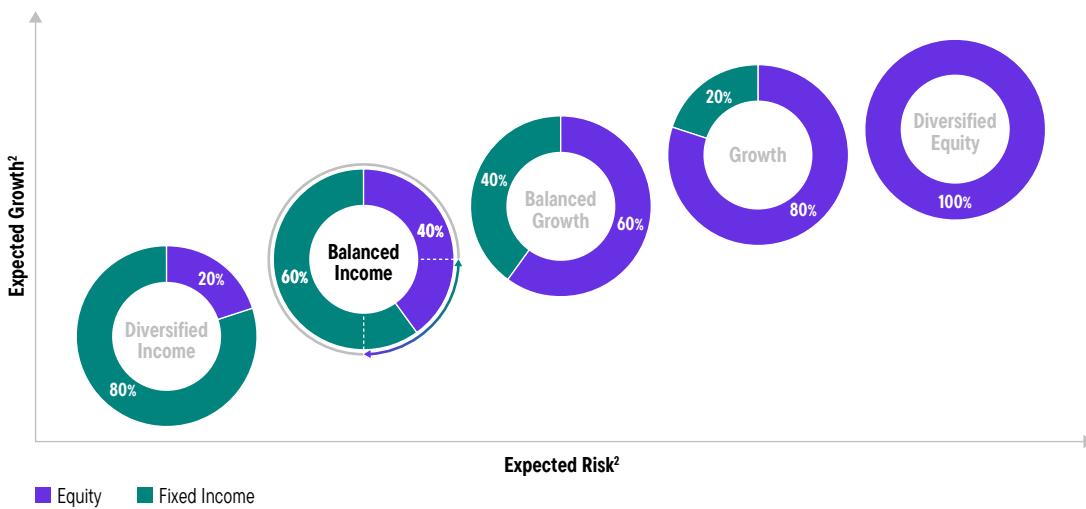

Structured to deliver long-term income and capitalize on short-term opportunities

- Employs a long-term, strategic asset allocation of 60% fixed income/40% equity, providing a set foundation for a balanced risk/return profile.
- Diversified across a variety of fixed income and equity securities, both domestically and around the world.
- Carefully constructed by combining styles, regions, market caps and income quality that each can perform uniquely throughout various points in the economic and market cycles.

Income for today, growth for tomorrow

- Our investment management approach promotes investment longevity, allowing investors to receive cash flow each month through the Series T option¹ or a Systematic Withdrawal Plan without significantly eroding the initial investment.

Your Portfolio's Risk/Return Profile: Balanced

Franklin Quotential Balanced Income Portfolio will have, under normal market conditions, an optimal asset mix of 50–75% fixed income and 25–50% equities.

A global approach. A Canadian perspective.

Franklin Templeton Investment Solutions (FTIS for short) is a group of multi-asset experts focused on creating total portfolio solutions integrated with risk management.

FTIS manages over CAD\$135 billion in assets, diversified across traditional and alternative asset classes. FTIS is embedded within Franklin Templeton's (FT's) global integrated platform, combining access to the local insights and global perspective of over 100 investment professionals. As of September 30, 2025, FT currently manages CAD\$2.3 trillion worldwide.

Franklin Quotential Portfolios are a targeted multi-asset solution offering diversification across asset classes, investment styles, quality and global markets. While the portfolios are managed in Canada, the investment team includes more than 95 professionals from around the globe. The team collaborates to: develop long-term capital market expectations; target and capture short-term opportunities with agility; and identify alpha sources and monitor bottom-up strategies.

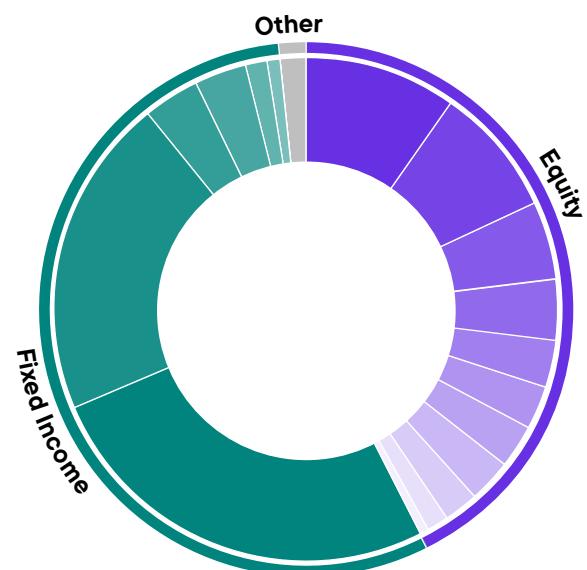

The team's investment process is guided by robust, risk-centric protocols that are designed to measure, monitor and manage risks at a granular level, ultimately aiming to verify that each and every risk has the potential to contribute to the long-term reward.

This unique combination of institutional diversification and investment discipline allows us to offer Canadian investors a strategic and forward-looking solution designed to meet their expected outcomes over the long term.

1. Series T distributions are in the form of return of capital (ROC). ROC reduces the adjusted cost base (ACB) of the investment. Once the ACB has been depleted, any further cash flow is taxable as a capital gain.
2. In relation to other Franklin Quotential Portfolios.
