

Navigating international growth with precision

Franklin ClearBridge International Growth Fund

September 2025

Investment objective and strategy

The Fund seeks to achieve long-term capital appreciation by investing primarily in equity securities of companies outside Canada and the United States.

Why invest in this strategy?

Active matters in international equities

Many international stocks can be mispriced by markets, especially in the short term. Active managers like ClearBridge can exploit these opportunities.

Diversification across the spectrum of growth

The team uses a fundamental, bottom-up approach to invest in quality businesses categorized across the spectrum of growth – structural, secular and emerging.

Investment process

1 Define the investment universe

Consider companies that have strong balance sheets, good management, offer unique products or services, or have strong niche positions locally or globally.

2 Apply fundamental analysis

Use a bottom-up approach to evaluate current and future prospects and ensure that accounting compliance, data accuracy and global comparability goals are met.

3 Select securities & construct portfolio

Build a diversified portfolio with roughly 40 to 70 stocks across 10 to 20 countries. Complement larger core holdings (approximately 80-90%) with tactical investments (approximately 10-20%) in smaller companies that have met our ESG criteria.

4 Monitor continuously

Re-examine a current holding when unit growth/earnings deteriorate, valuation exceeds expectations, and when there is an adverse acquisition or a loss of franchise or market share.
